

SPACE ELECTRONICS RELIABILITY LABORATORY

AEROSPACE GRADE SCREENING & HIGH-REL BURN-IN CONFORMANCE
STANDARDS: MIL-STD-883K METHOD 1015 COND D | AEC-Q001 REV-D | ESA ECSS-Q-ST-60C

Certificate ID:	COC-ISRO-2026-LOTTESTC	Issue Date:	2026-10-01 16:25 UTC
Production Lot ID:	LOT-TEST-COC	Screening Bay:	CHROMA-58158-BAY04
Flight Mission Tier:	CLASS S / LEVEL 1 (DEEP SPACE)	Chamber Condition:	125.0°C ± 1.0°C, Static Bias 3.3V

1. Lot Statistical Screening Summary (AEC-Q001 Dynamic PAT)

Metric Parameter	Observed Value	Acceptance Criterion	Status
Total Components Screened	20 Units	Full 100% In-Line Lot	INSPECTED
AEC-Q001 Conforming (ACCEPT)	18 Units (90.0%)	Baseline Flight Stock	PASSED
Secondary Review (REVIEW)	0 Units (0.0%)	Bench Curve-Trace	FLAGGED
Latent Defect Rejection (REJECT)	2 Units (10.0%)	< 5.0% Lot Scrap Ceiling	TERMINATED
Maverick Lot Evaluation	ALERT: MAVERICK LOT (>5% SCRAP)	AEC-Q001 Rev-D Clause 4.3	ACTION REQUIRED
Lot Median 0h / 24h Leakage	10.95 µA / 11.15 µA	Max Limit: 50.00 µA	IN-SPEC
Burn-In Chamber Hours Saved	288 Hours	Early Term. @ 24h	OPTIMIZED

2. Flight Model Authenticity & Cryptographic Verification

Cryptographic SHA-256 Seal of Test Dataset:
cccbfd90fbe41c1ed3695146746fd2a81a3ee790ca254cf124c6eb40def fe628

This Certificate of Conformance is digitally linked to the raw parametric test vector recorded during Environmental Stress Screening (ESS). Scan the QR code or verify against the Space Mission Registry.

3. Space Quality Assurance Sign-off

Certified By:	Dr. K. S. Raman, Head of Space Quality Assurance
QA Designation:	Space Flight Model Screening Authority
Compliance Statement:	I hereby certify that the electronic components listed under this lot have been processed through the automated multi-lot Dynamic PAT and 168h predictive drift screening in full compliance with MIL-STD-883K Method 1015 Condition D and AEC-Q001 Rev-D standards.
Digital Signature:	VERIFIED & DIGITALLY STAMPED [2026-10-01 16:25:10 UTC]
